

## BioProtect SA™ Hand Disinfectant

### Clean hands keep you protected.

Germ is everywhere, from handles to laptops and phones, to your children's toys. The most important way to protect yourself, your family, and your co-workers are to keep your hands sanitized and protected with BioProtect SA™.

### BioProtect SA™ Hand Disinfectant:

- Provides up to 6 hours of increased hand protection
- Kills 99.999% of germs and microbes on hands
- Water-based, Alcohol-free, Paraben-free, Sulfate-free
- EN1276/SANS51276 Certification
- 60 Sec Contact Time - Achieved a 5-log Reduction
- International Standard Test ISO4833 Certification for 30 days after 1st treatment : > 5 Log reduction in viable bacteria in 5 Minutes

### Up to 6-hours of hand protection:

Germ from hands are spread to touch surfaces, to someone else's hands upon touch. These surfaces include handles, computers, toys, taps, banking card machines, and shopping trolleys, to name a few.

Unknowingly, individuals frequently rub their eyes, touch their nose and mouth, transferring germs into the human body. Once in the body, these germs cause various ailments, particularly to those at risk, such as pregnant women, children, or those whose immune systems are compromised.

BioProtect SA™ Hand Disinfectant is a water-based hand disinfectant that cleans away germs and microscopic organisms. For a purifying experience, BioProtect SA™ provides extended protection for up to 6 hours.
